

Do's and Don'ts for GTT150 and GTT150HD Gas Tool Use & Maintenance

September 2019

Do's and Don'ts for GTT150 and GTT150HD Gas Tools:

1. Ensure battery is charged
2. Check to see if fuel is fresh (not out of date)
3. Check to see if fuel cell has fuel
4. Inspect fuel cell valve for damage and is secure to cell
5. Inspect magazine for damage and fully secured!
6. Adjust depth of drive for flush drive to avoid overdriving that may cause premature wear and damage
7. Make sure fuel cell is properly inserted with metering valve into fuel intake.
8. Never use tools in the rain.
7. Check tool manual for further direction.
